

Job title	<i>Internship – Cybersecurity Analyst</i>
Reports to	<i>Associate</i>

Job purpose

This internship is designed to provide exposure to the design, development, deployment and operation of an Information Security Management System (ISMS). This is a techno-functional role, heavily weighted to meeting compliance and documentation requirements, although candidates should also be comfortable setting up and administrating Azure infrastructure solutions. Over the course of twelve weeks candidates will be gaining exposure to broad range of technical and regulatory factors that impact the design and operation of an ISMS.

Duties and responsibilities

Internships are pre-entry level positions that provide candidates with the opportunity to work with experienced professionals to help formulate future career decisions. As an Intern you will have the opportunity to create value for the organization while continuing your educational process. You will be working with senior management to develop and implement security policy.

The Intern will get exposure to the following areas:

- IT Technical Strategy
- IT Security and Controls
- IT Security Compliance
- Microsoft Azure Architecture and Administration

Interns will be provided with training materials for Microsoft Exam AZ-900: Microsoft Azure Fundamentals and will be reimbursed for testing fees upon successful completion of exams while employed.

Qualifications

Required qualifications include:

- Must be detail orientated and have outstanding written communication skills. This role will require a great deal of writing.
- Must be familiar with cybersecurity concepts, including common exploits and the approaches used to secure computers and networks.
- Must be familiar with Microsoft Azure and Microsoft Active Directory.
- Willingness to learn/work/collaborate with a cohesive team.
- Ability to solve complex problems and communicate opportunities for improvement for existing systems
- Legal authorization to work in the US. We will not sponsor individuals for employment visas, now or in the future, for this job opening.

Desired qualifications include:

- Understanding of the structure and operation of an ISMS. Experience with the ISO 27001 framework and/or SOC2 auditing principles is a plus.

- Education: Achieved or pursuing a degree in Information Systems, Accounting, Computer Science or a related field; 3.0 GPA preferred (either accumulative or program specific). Candidates with equivalent experience or technical certifications will be considered.
- Intermediate knowledge of Microsoft Office 365
- Ability and willingness to learn and innovate

Working conditions

You will be scheduled to be at the office 3 days per week. Interns are generally not permitted to telecommute. You may be eligible for more hours as the business requires, but this internship is structured to provide candidates with time to study for exams. At the conclusion of the internship you may, or may not, receive a full-time offer with Kynekyd, but a successful internship will provide you with practical experience and put you on track to become a Microsoft Certified Azure Expert.

Direct reports

None.

EEO Statement

Kynekyd is an Equal Opportunity/Affirmative Action employer.
