

Job title	<i>Technology Intern – Full-Stack Developer</i>
Reports to	<i>Associate</i>

Job purpose

This internship is designed to provide exposure to the design, development, deployment and operation of an Information Security Management System (ISMS). This is a techno-functional role, heavily weighted to meeting compliance and documentation requirements, although candidates should also be comfortable setting up and administrating Azure infrastructure solutions. Over the course of twelve weeks candidates will be gaining exposure to broad range of technical and regulatory factors that impact the design and operation of an ISMS.

Duties and responsibilities

Internships are pre-entry level positions that provide candidates with exposure to the software development, testing and deployment cycle. As an Intern you will have the opportunity to create value for the organization while continuing your educational process. You will be working with an international team, under the close direction of experienced engineers, to develop business applications using Microsoft technologies.

The Intern will get exposure to the following areas:

- IT Technical Strategy
- IT Architecture
- IT Security and Controls
- Agile Development Principles
- Full-Stack Development

During the internship the candidate will be strongly encouraged to begin the processes of becoming a Microsoft Certified Solutions Developer (MCSD). Candidates will be provided with training materials and will be reimbursed for testing fees upon successful completion of exams while employed.

Qualifications

Required qualifications include:

- Must be familiar with .Net full-stack development using Visual Studio
- Willingness to learn/work/collaborate with a cohesive team
- Ability to solve complex problems and communicate opportunities of improvement for existing systems
- Legal authorization to work in the US. We will not sponsor individuals for employment visas, now or in the future, for this job opening.

Desired qualifications include:

- Team player with strong communication skills that displays intrapreneurship, strong technical and analytics skills, knowledge of .Net framework and embraces Agile culture

- Education: Achieved or pursuing a degree in engineering, IT/MIS/Computer Science, or related field; 3.0 GPA preferred (either accumulative or program specific). Candidates with equivalent experience or technical certifications will be considered.
- Basic knowledge of Microsoft Office 365
- Experience with Microsoft DevOps
- Experience with source control such as MS Team Foundation Server
- Experience with SQL and NoSQL databases
- Experience with Microsoft Azure
- Ability to obtain .Net /Dynamics 365/Azure certifications
- Ability and willingness to learn and innovate

Working conditions

You will be scheduled to be at the office 3 days per week. Interns are generally not permitted to telecommute. You may be eligible for more hours as the business requires, but this internship is structured to provide candidates with time to study for exams. At the conclusion of the internship you may, or may not, receive a full-time offer with Kynektyd, but a successful internship will provide you with practical experience and put you on track to become a Microsoft Certified Solutions Developer.

Direct reports

None.

EEO Statement

Kynektyd is an Equal Opportunity/Affirmative Action employer.
